We count the time in
seconds, minutes,
hours, days, weeks,
months, seasons,
years...

Winter, spring,
summer, autumn...
cyclically return:
it's a new year.

And we count them,
they mark our history,
they help us remember.

E

E

A year later, 10 years later,
20 years later...
we still feel there, still the same,
but every time we are different.

One is made of paper,
25 is silver, 50 is gold,
60 is diamond ...
every anniversary has
its symbol.

Centenarians are mythical.

A birthday, a wedding, the
landing on the moon, a war...
the anniversary bring us a smile
or a tear.

Without anniversaries, we would not
have history and experience:
our foundations
for better
look forward.
